

New Location

Clifton Community Center is located at 3270 D 1/2 Rd, Clifton, CO.

Tech Training Credits

Non-licensed employees of commercial, limited commercial or public applicators can receive up to 12 1/2 hours of verified technician classroom/instructional training credits in many required categories. Individuals who receive technician training credits can register at the \$70 rate.

Continuing Education Credits

In Colorado, anyone engaged in the business of applying or supervising the use of pesticides in exchange for payment is required to be licensed as a Commercial Pesticide Applicator by the Colorado Department of Agriculture (CDA). Private pesticide applicators must be licensed by the CDA before they may purchase or apply restricted use pesticides on their own lands.

The Western Colorado Pest Management Workshop is conducted annually to provide all licensed pesticide applicators the opportunity to receive the continuing education units required to maintain their license with CDA.

This program is for pesticide applicators who are already licensed. If you do not have a current pesticide applicators license, you must take a test and be licensed with the CDA before continuing education credits can be issued.

The Tuesday morning program meets all continuing education credit requirements for private pesticide applicators. This session fulfills core categories for commercial pesticide applicators, who are required to attend additional one-hour sessions in each category for which they are licensed.

Continuing education credits are also available for commercial pesticide applicators licensed in UT and NM. If other state credits are needed please email Melissa.franklin@colostate.edu no later than 30 days prior to the workshop, and we will try to make arrangements.
